```sql
SELECT TOP (10)
    [Order Number],
    [Quantity Ordered],
    [Unit Price],
    [Total Amount],
    [Transaction Date],
    [Shipping Status],
    [Transaction Year],
    [Product Name],
    [MSRP],
    [Product Code],
    [Customer Name]
FROM [Kaptagat Springs Sales Data].[dbo].['Kaptagat Springs Sales Insights$'];
```

2. Descriptive Statistics

To get basic statistics like count, minimum, maximum, average, and standard deviation for numerical columns:

sql   Copy code

```sql
SELECT
    COUNT(*) AS TotalOrders,
    MIN([Quantity Ordered]) AS MinQuantityOrdered,
    MAX([Quantity Ordered]) AS MaxQuantityOrdered,
    AVG([Quantity Ordered]) AS AvgQuantityOrdered,
    STDEV([Quantity Ordered]) AS StdDevQuantityOrdered,
```
